Senior Classes

Grainne Behan

Today you will be making your own DIY Lava Lamp

Equipment list

1.

See through water bottle/ tall mason jar

2.

Baking soda

3.

Vegetable oil

4.

Food Colouring

5.

Small Cup & Spoon

6.

Vinegar

Step 1:

◆ Get the empty bottle or tall jar/cup, add three spoons of baking soda

Step 2:

- ◆ Add the vegetable oil, in this step you should fill the container two thirds full with oil
- ◆ The baking soda will stay on the bottom of the container
- ◆ Do not mix it with the oil

Step 3:

- ◊ In the small bowl,(not the container with the baking soda and oil in).
- ◊ Add some vinegar (table spoon)
- ◊ Add three drops of food colouring (the colour of your chosen food colouring will be the colour shown in your lava lamp)

Step 4:

- ◆ Now you have everything ready!, you can add some drops of the coloured vinegar liquid in the small bowl in to your big clear container
- ◆ Do not add all the vinegar all at once , instead do it progressively to make it last longer

Final Step

- ◆ For a glowing effect, turn off lights and use a flashlight under the container to light it up
- ◆ Ensure you do not close the lid of the container,
